## Education

**Masters in Computer Science (GPA: 4.0/4.0)**

Boise State University

Expected Dec 2026

Boise, Idaho

**Relevant Courses:** Deep Learning, Foundations of AI, Database

**Bachelor of Engineering: Computer Engineering (GPA: 9.77/10)**

Chitkara University

July 2022

Himachal Pradesh, India

**Relevant Courses:** Programming in C, Operating Systems, Computer Networks, Linux

---

## Skills

- **Languages & Frameworks:** Python, Java, Javascript, C#, SpringBoot, ExpressJS, React
- **Cloud & DevOps:** AWS (Lambda, ECS, EC2, S3, RDS), Docker, Jenkins, GitHub Actions
- **Databases & Tools:** PostgreSQL, Elasticsearch, MongoDB, Redis, RabbitMQ

---

## Experience

**Graduate Research Assistant**

Boise State University

August 2025 – Present

Boise, Idaho

- Worked in the Artificial Intelligence-based Security Lab, focusing on Wikipedia's policies on LLM-generated content.

**Software Engineer II**

Smart Data Solutions (US Headquarters: Eagan, MN)

December 2023 – December 2024

Kathmandu, Nepal

- Developed a robust SLA Tracker to monitor file transfers for US healthcare clients, ensuring 100% compliance with service agreements.
- Optimized the SLA automation project's backend by re-engineering complex SQL queries, slashing execution time on millions of documents from minutes to seconds to ensure timely report delivery.

**Software Engineer II**

YantraCore Tech

September 2022 – December 2023

Kathmandu, Nepal

- Led full-stack development for Restroverse, a dynamic food and lodging platform, by optimizing the backend API with MyBatis to achieve an 8x performance increase, hardening security with Spring Security, and accelerating front-end load times via UI component chunking.
- Drove the platform's growth from MVP to registering over 3,000 businesses by establishing a scalable infrastructure with Docker-containerized microservices and a robust CI/CD pipeline using Jenkins and GitHub Actions.

**Software Engineer**

Dogma Group

March 2022 – September 2022

Kathmandu, Nepal

- Engineered a high-performance REST API client to automate the synchronization of millions of records by enabling efficient, paginated data fetching from the client's system.

**Software Developer Intern**

Avis E Solution Pvt Ltd

June 2021 – January 2022

Noida, India

- Enhanced live VERVE mobile DialerApp during the COVID-19 pandemic by implementing a secure, unified authentication system using SSO and JWT to support critical remote call solutions.
